

TLS 450 PLUS VIDEOS FOR OPERATOR

Menu Overview:

Lee Girard, Product Manager for ATG, discusses the main components of the TLS-450PLUS Automatic Tank Gauge software and how to begin navigating through it.

<https://youtu.be/Dq5HFTVW1M4>

Tank Overview:

A quick demonstration of the TLS-450PLUS Tank Overview screen. Including how to read the tank displays and tank characteristics like; volume, ullage, temperature compensated volume, capacity, etc. Also covered are the available limits for your tanks that can be set within the software for monitoring real-time inventory events.

<https://youtu.be/yHgt5Hjf-f8>

Inventory Reports:

Review of the Inventory Reporting options including Current Inventory, Inventory History, Power Outage Inventory, and Shift Inventory. This includes a quick demonstration of how probe selection will affect available data, as well as, how to set up Inventory History records to provide daily or shift inventory reconciliation data

<https://youtu.be/71fOkKeGLso>

Delivery Reports:

Continuation of the discussion of Delivery Reporting including the configuration of the Delivery History report. These reports give you access to delivery data going back up to three years and allow you to configure your reports to custom data ranges that you choose.

<https://youtu.be/Ly-514A3Tx8>

Alarm History:

Generating an Alarm History report on the TLS-450PLUS Automatic Tank Gauge to show regulatory compliance for a specific date range.

<https://youtu.be/2sTWxM5Zfyg>

Sensor Reports:

In this quick tutorial Lee Girard, Product Manager for Automatic Tank Gauges, discusses the importance of sensor status and history reports and how to find them on the TLS-450PLUS Automatic Tank Gauge. This review also includes a look at the current status of all installed sensors and review of sensor history for a specific data range or period.

<https://youtu.be/1JkVnxuNmVE>

Environmental Regulatory Reports:

Navigating through the Environmental Regulatory Reports and the options available within the menu. Review of the Combined Tank Test report and what the report on a Veeder-Root Automatic Tank Gauge is providing, including examples of the full gross (3 gallon) and periodic (0.2 gallon) tests.

<https://youtu.be/8v-Ftp2uKk>

Reports and System Alarms:

A quick walk through of the process for generating the reports that operators will typically need to get from the TLS-450PLUS. Including navigating through the menu and creating the System Alarms report.
